AGILE TESTING SERVICES

An evolution in testing.

Automating tests

early and often.
Automated tests are fully leveraged to implement regression.

Reviewing quality

throughout all stages of the development process. QA participates in the big picture requirements writing stage.

Adopting a team

approach to identifying and addressing quality issues. The entire team agrees to the testing strategies, test cases and defects prioritization plan.

Establishing agile testing processes is our expertise.

Our testers understand speed, feature stories, and Agile test design. At QAT Global, we advance along with the industry's latest methodologies and have a proven agile testing methodology. We offer Agile testing on-site or from our Brazil or Costa Rica nearshore offices, allowing you to take advantage of QA testing in whatever model best fits your business needs.

QAT Global provides testing services using our proprietary Agile testing approach, which is based on standard Agile principles and augmented with our own expertise. Our services are customized to meet each client's unique business needs. We utilize proven testing approaches to effectively support the client's technical environment.

REACH US.

We look forward to hearing from you.
