CAPITALIZING ON
CLOUD COMPUTING
ANSWERS THAT MINIMIZE RISK AND MAXIMIZE SUCCESS

As you embrace the cloud and develop and implement your cloud strategy to fully exploit all the potential benefits, partner with QAT Global. We have the expertise to assist you in developing your hybrid approach to private and public cloud – integrating cloud applications, infrastructure, and legacy systems from planning to migration to ongoing management. We use a service-oriented approach and hands-on experience to help clients leverage cloud technologies from strategy through implementation for maximum business value.

Cloud computing can empower your business to innovate in new and valuable ways:

- Explore innovative ideas by quickly building and "live beta testing" solutions with little risk, IT involvement and cost
- Bring new innovative products and services to market
- Extend collaboration and information access to customers, partners and employees anywhere, anytime, from any device
- Gain deeper insight from complex analytics on extremely large datasets in an accelerated timeframe

From strategic guidance to migration, from hosting to ongoing management, QAT Global's Cloud Computing Services enable you to make smart choices for your business that drive faster results, provide flexibility to embrace growth, and optimize your complete environment.

We are here for you as a trusted partner, not just another services provider. Working together, we can develop and implement a best practice-based strategic plan for cloud computing success, architect and implement enterprise, consumer and carrier-scale cloud products designed to support as many end users, from thousands to millions, as needed.
