

SELECTING THE RIGHT ENGAGEMENT MODEL FOR YOUR BUSINESS

WWW.QAT.COM

Selecting an IT consulting company is about transparency, repeatability, communication, and governance. At QAT Global, we have instituted living best practices for our distributed development engagement models that deliver on each of these critical factors helping clients reduce time to market, delivering quality software and improving the communications between business and IT stakeholders.

Engagement Models to Meet Your Needs

We designed our engagement models to optimize resources, increase development speed, ensure quality, and provide high-value results. Whether you want to incorporate a few development resources into your in-house team; have us manage the development of your product from concept to production to enhancement, or take advantage of a blended onshore-nearshore model, we have the expertise and resources you need to accelerate business growth and deliver world-class solutions.
