

RURAL SOURCING

Rural sourcing, also known as onshoring or domestic sourcing, involves sending work to service providers in rural locations where the cost of living and operating expenses are lower. It is a cost competitive alternative for companies that want to avoid the negative aspects of offshoring to locations like India and China.

QAT Global is a leader in rural and cross sourcing options for software development, support, testing, and maintenance for critical business applications; cost-effective alternatives to the traditional model for IT outsourcing. By leveraging rural development centers to create custom teams, we are able to help you bring new products to market more quickly, achieve business goals more effectively, and operate with a high level of efficiency.

BRIDGING THE GAP BETWEEN BUSINESS NEEDS AND TECHNOLOGY DELIVERY

With our specialized training, our rural-based workforce is delivering practical, world-class IT services for public, private, local, and global technology clients – all at competitive prices and superior quality and convenience to other offshore alternatives. Ready to save 20-40% over metro areas?

■ Exceptional Value

By locating software development and testing centers in rural areas, QAT Global is able to lower costs while maintaining the high quality customers expect.

■ Reliable Processes

A strong focus on tools, processes, and infrastructure for integration and collaboration between teams to ensure best practices driven program management and governance.

■ Custom Teams

While most outsourcing providers do their best to fit existing teams to your needs, we develop custom teams who are committed to your company and QAT Global. This ensures low turnover, fast ramp up, and cost effectiveness from start to finish.

■ Easy Communication

If you have a problem, you can get right on the phone and talk through the issue real-time. No time, language, or cultural barriers.

■ Lasting Relationships

We truly care about our clients and delivering strong business value. Our clients become long-term partners and you will too with agile solutions, strong ROI, and support.

■ High Quality

Our approach invests heavily in talent acquisition, training, and workforce development across the entire service value chain. Young, energetic, and talented associates join teams of experts to take responsibility for well-defined tasks that match their skills.
