Capability Statement

QAT Global is a global information technology (IT) services company providing full lifecycle services ranging from business analysis and IT consulting to Agile-based software development, implementation, and support. Founded in 1995, our corporate offices are in downtown Omaha, Nebraska. Our growing team of 200+ staff serve the federal and state government, commercial enterprise, and startup markets across the US.

Our Core Capabilities

We pride ourselves in being a leader in the delivery of enterprise business solutions through the innovative use of technologies such as Enterprise Java, .NET, and Open Source components. QAT Global brings extensive experience in CIO-level technology management, software development, data analytics, and distributed development. We offer a comprehensive range of IT services, including custom software development, legacy modernization, IT staff augmentation, mobile and web development, SaaS product development, software reengineering and support, digital transformation, and nearshore outsourcing.

Enterprise Custom Software Development

We deliver forward-thinking, cost-effective and reliable custom software solutions that match unique client requirements.

- Custom technical solutions and rapid application development in cloud and non-cloud environments
- Agile software development processes
- Mobile PWA and web app development
- Custom data and systems integration
- End-to-end business solutions
- Professional delivery management expertise

Information Technology Consulting Services

Our IT consulting services help businesses and governments align their technology strategy with organizational value to achieve their business goals and objectives. Our industry experts advise clients on how to maximize current technology investments, create and execute on a modernization plan, and take advantage of new technologies.

Technology Expertise

Our unique competence in various technologies and use of proven, repeatable processes enables us to deliver integrated, scalable, robust solutions with the optimal cost/performance ratio. A few of our core technology competencies include:

- .NET Development
- Java Development
- Cloud Computing
- Open Source
- Progressive Web Apps
- Application Integration
- Microservices
- UX/UI Design
- IoT
